

Amendments to the Specification:

Page 1, delete the first paragraph and insert in place thereof:

--This application is a continuation of application Serial No. 09/989,295, filed November 20, 2001, which is a continuation of application Serial No. 09/388,968, filed September 2, 1999, which application claims benefit of Provisional Application Serial No. 60/098,854, filed September 2, 1998. The disclosure of each of these applications is incorporated in its entirety herein by reference.--

Page 10, delete the first paragraph and insert in place thereof:

--Examples of the pharmaceutically active component which may be benefitted by the presence of cyclodextrin components in the present invention include, but are not limited to, diphenyl hydantoin, adiphenine, allobarbital, aminobenzoic acid, amobarbital, ampicillin, anethole, aspirin, azopropazone, azulene barbituric acid, beclomethasone, beclomethasone dipropionate, bencyclane, benzaldehyde, benzocaine, benzodiazepines, benzothiazide, betamethasone, betamethasone 17-valerate, bromobenzoic acid bromoisovalerylurea, butyl-p-aminobenzoate, chloralhydrate, chlorambucil, chloramphenicol, chlorobenzoic acid, chlorpromazine, cinnamic acid, clofibrate, coenzyme A, cortisone, cortisone acetate, cyclobarbital, cyclohexyl anthranilate, deoxycholic acid, dexamethasone, dexamethasone acetate, diazepam, digitoxin, digoxin, estradiol, flufenamic acid, fluocinolone acetonide, 5-fluorouracil, flurbiprofen, griseofulvin, guaiaculene, hydrocortisone, hydrocortisone acetate, ibuprofen, indican, indomethacin, iodine, ketoprofen, lankacidin-group antibiotics, mefenamic acid, menadione, mephobarbital, methbarbital,

methicillin, metronidazole, mitomycin, nitrazepam, nitroglycerin, nitrosureas, paramethasone, penicillin, pentobarbital, phenobarbital, phenobarbitone, phenyl-butyric acid, phenyl-valeric acid, phenytoin, prednisolone, prednisolone acetate, prednisone, progesterone, propylparaben, proscillaridin, prostaglandin A series, prostaglandin B series, prostaglandin E series, prostaglandin F series, quinoline anti-microbials reserpine, spironolactone, sulfacetamide sodium, sulfonamide, androgens, including but not limited to testosterone, thalidomide, thiamine dilaurylsulphate, thiamphenicolpalmitate, thiopental, triamcinolone, vitamin A, vitamin D3, vitamin E, vitamin K3, and warfarin.--

Page 23, delete the last paragraph and insert in place thereof:

--With regard to compositions including stabilized chlorine dioxide, Compositions 26, 28 and 29 fail the EP-A and EP-B criteria because of either or both *C. albicans* and *A. niger* or just *A. niger*. Each of these compositions pass the USPET criteria. Composition 27 shows interesting results. This composition fails the EP-A criteria for *C. albicans* and *A. niger*, but passes both USPET and EP-B criteria. Upon repeat of the test, the composition passes the EP-A criteria.--

Page 26, delete the last paragraph and insert in place thereof:

--While this invention has been described with respect to various specific examples and embodiments, it is to be understood that the invention is not limited thereto and that it can be variously practiced within the scope of the following claims.
